

**THE FUTURE OF  
FINE WATCHMAKING**

**URWERK** PRESENTS **THE UR202** WHITE GOLD  
AND ITS REVOLVING SATELLITE COMPLICATION  
also available in red gold and AlTiN

**URWERK** has its origins in the town of Ur in Mesopotamia. In 6000 BC, Ur's inhabitants, the Sumerians, defined the very first unit of time; thus laying the foundation for the measurement of time as we know it today. Our work is a tribute to this past so much linked up to our present. Enter with us the circle of time.
